

My Solitude

My solitudes are a reminiscence of my past as well as an expression of my mind and mood in regard to my feelings about my surroundings, my fellows and the unknown mystery the God, and the Nature. Sometimes the feeling is so great that it takes me away beyond all the limits of thoughtfulness and I spell them out on paper in shape of the poems.

This is my own way to do away the things that keeps me bothering for long, Going through the poems one see them in the same order of my previous work 'Dreams, Desires and Dismays'. For the reason unknown women—folk has always been an inspiring factor in my poetry. I always have a soft corner for them, I always found them affectionate, friendly, loving one, and no doubt lovable too. They never let me feel aloof in my solitude of the dark.

The poems are in general my concern about the weaker sex, the Nature, the politics, the environment and the other burning problems of the society.

Once again I will repeat this is my own way to look at the things and no way an attempt to endorse my doctrine or philosophy on the reader.
